

How to enter SANCTUM

This project hides its front door on purpose. Here is everything you need to get inside — and how to present it.

LIVE project-sanctum-ppt.vercel.app

STEP 1 — You land on a decoy

The site opens on "Andoria Deep-Sky Archive" — a dead astronomy blog from 1998. That is the network's disguise. **Don't worry, this is intentional.**

STEP 2 — Find the secret

1. In the blog's nav, click Gallery.
2. Find Fig. 5 — "Unidentified object, 14 Nov 1998" (the faint ring of light).
3. Click it three times. An "ACCESS REQUEST" prompt appears.
4. Enter the code:

HIDE

5. The bootloader plays, then the deck opens.

Short on time? Skip ahead

Add ?unlock to the URL to jump straight into the deck — project-sanctum-ppt.vercel.app/?unlock

M mute

? help

D reset access

The two things to see

- The journey — 12 slides, each with its own live 3D setpiece. Use **A** to auto-play.
- The panic key — press **~** and the whole network vanishes back into the blog. Press it again to return.
